

Klemmukort

- Klemmukort eru sjávrættandi uppgávur, soleiðis at næmingar kunnu sita og arbeiða sjálvstøðugt, uttan at hava tørv á hjálp frá lærara.

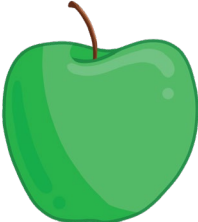

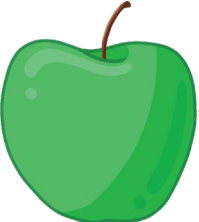

Soleiðis gert tú

- Printa klemmukortini út. Um tað ber til, er gott at printa á tjúkt pappír. Klipp rundanum for-og baksíðuna á hvørjum klemmukorti, og límarnar síðurnar saman. Síðan laminerar tú klemmukortið og klippir aftur.

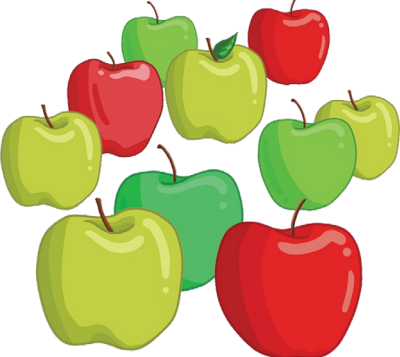

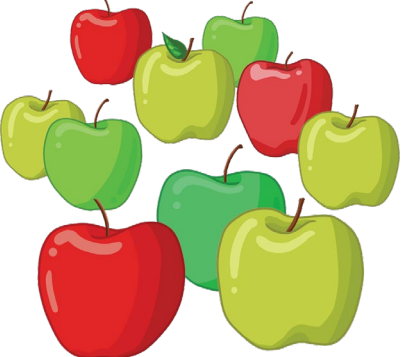

Hvussu loysir mann upgávuna?

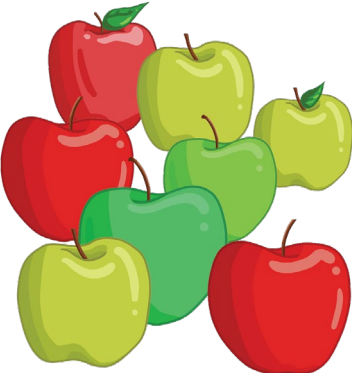

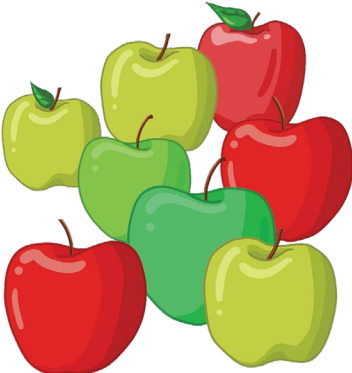

- Næmingurin loysir uppgávuna við at seta klemmu á talið, ið samsvarar við nøgdina av súreplum, ið eru á myndini.
- Tá ið næmingurin er liðugur, vendir hann klemmikortinum og sær síðan um hann hevur svarað rætt.
- Góðan lærihug :)
